PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science (AI & ML) with hands-on experience in Python, FAST API, REST APIs, SQL, and AI-powered applications. Built full-stack and intelligent systems integrating LLMs and prompt engineering. Possess strong problem-solving abilities and practical knowledge of Data Structures and Algorithms, with a passion for building scalable software solutions and learning new technologies.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Frontend: HTML5, CSS3, Bootstrap

Backend & Databases: Flask, FastAPI, REST APIs, SQLite

AI & ML: LLMs, Prompt Engineering, Retrieval-Augmented Generation (RAG)

Tools & Practices: ChatGPT, Claude, GitHub Copilot

PROJECTS

AI Personal Assistant

Technology Stack: Python, FastAPI, SQLite, Whisper, Ollama, LLMs, Git

• Designed and built a modular AI assistant with voice interaction, task automation, and contextual conversations using LLMs and prompt engineering.

• Developed RESTful APIs with FastAPI for communication between backend services and client applications, following clean and maintainable code practices.

• Implemented short-term memory using SQLite to remember few things related to the user.

• Built the application using a scalable and modular architecture supporting future multi-device integrations and AI agent capabilities.

Smart Alarm System

Technology Stack: Python, OpenWeatherMap API, Requests, pyttsx3, Datetime.

• Developed a Python-based smart alarm system that integrates real-time weather data to adjust wake-up schedules based on environmental conditions.

• Implemented modular task scheduling, API error handling, text-to-speech notifications, and automated alarm playback for scheduled activities.

Student DigiCards

Technology Stack: HTML, CSS, JavaScript, Bootstrap

• Developed a responsive frontend web application for generating and managing digital student ID cards with reusable UI components and LocalStorage-based persistence.

• Enhanced application usability by implementing responsive layouts and intuitive navigation, ensuring compatibility across desktop and mobile devices.

EDUCATION

Vignan Institute of Technology and Science

Bachelors of Technology in Computer Science- (Artificial Intelligence & Machine Learning) 2021 – 2025

CERTIFICATIONS

Programming Foundations with Python - CCBP

Introduction to Databases (SQL) - CCBP

JavaScript Essentials - CCBP
